Important Disclosure

The performance data quoted here represents past performance. Current performance may be lower or higher than the performance data quoted above. Investment return and principal value will fluctuate, so that shares, when redeemed, may be worth more or less than their original cost. Past performance is no guarantee of future results. The total annual fund operating expenses are Class A 2.43%, Class C 3.18% and Class I 2.18%. The Fund's advisor has contractually agreed to reduce the fees and/or absorb expenses of the Fund, at least until January 31, 2017, to ensure that the net annual fund operating expenses will not exceed 2.14% for Class A, 2.89% for Class C and 1.89% for Class I, subject to possible recoupment from the Fund in future years. The maximum sale charge for Class A shares is 5.75%. For performance information current to the most recent month-end, please call **toll-free 800-519-0438** or visit our website, **www.probabilitiesfund.com**.

Important Disclosures

Investors should carefully consider the investment objectives, risks, charges and expenses of the Probabilities Fund. This and other important information about the Fund is contained in the Prospectus, which can be obtained by contacting your financial advisor, or by calling 1.888.868.9501. The Prospectus should be read carefully before investing. Probabilities Fund is distributed by Northern Lights Distributors, LLC member FINRA/SIPC. Probabilities Fund Management, LLC and Northern Lights Distributors are not affiliated.

Performance shown before the inception date of the mutual fund, December 12, 2013, is for the Fund's predecessor limited partnership. The prior performance is net of management fee and other expenses, including the effect of the performance fee. The Fund's investment goals, policies, guidelines and restrictions are similar to the predecessor limited partnership. From its inception date, the predecessor limited partnership was not subject to certain investment restrictions, diversification requirements and other restrictions of the Investment Company Act of 1940 which if they had been applicable, it might have adversely affected its performance. In addition, the predecessor limited partnership was not subject to sales loads that would have adversely affected performance. Performance of the predecessor fund is not an indicator of future results.

Mutual Funds involve risk including the possible loss of principal.

ETFs are subject to investment advisory and other expenses, which will be indirectly paid by the Fund. As a result, your cost of investing in the Fund will be higher than the cost of investing directly in the ETFs and may be higher than other mutual funds that invest directly in stocks and bonds. Each ETF is subject to specific risks, depending on its investments. Leveraged ETFs employ leverage, which magnifies the changes in the value of the Leveraged ETFs, which could result in significant losses to the Fund. The Fund invests in Leveraged ETFs in an effort to deliver daily performance at twice the rate of the underlying index and if held over long periods of time, particularly in volatile markets, the ETFs may not achieve their objective and may, in fact, perform contrary to expectations. Inverse ETFs are designed to rise in price when stock prices are falling.

Inverse ETFs tend to limit the Fund's participation in overall market-wide gains. Accordingly, their performance over longer terms can perform very differently than underlying assets and benchmarks, and volatile markets can amplify this effect.

The advisor's judgment about the attractiveness, value and potential appreciation of particular security or derivative in which the Fund invests or sells short may prove to be incorrect and may not produce the desired results. Equity prices can fall rapidly in response to developments affecting a specific company or industry, or to changing economic, political or market conditions. A higher portfolio turnover may result in higher transactional and brokerage costs. The indices shown are for informational purposes only and are not reflective of any investment. As it is not possible to invest in the indices, the data shown does not reflect or compare features of an actual investment, such as its objectives, costs and expenses, liquidity, safety, guarantees or insurance, fluctuation of principal or return, or tax features. Past performance does not guarantee future results.

Merger Arb: The IQ Merger Arbitrage Index seeks to achieve capital appreciation by investing in global companies for which there has been a public announcement of a takeover by an acquirer.

Multi-strategy: The Wilshire Liquid Alternative Multi-Strategy Index measures the performance of strategies that invest in multiple alternative managers/fund of funds and replication strategies.

Equity Hedge: The Wilshire Liquid Alternative Equity Hedge Index measures the performance of investment strategies predominantly invested in long and short equities.

REIT: The Wilshire US Real Estate Investment Trust Index measures U.S. publicly-traded real estate investment trusts.

MLP: The Alerian MLP Index is the leading gauge of energy Master Limited Partnerships.

Diversified Alt: The Morningstar Diversified Alternatives Index is comprised of seven alternative asset classes that broadly represent the alternative landscape, hedge funds, long/short equity, merger arbitrage, managed futures, breakeven Inflation, global Infrastructure, and listed private equity.

Managed Futures: The Credit Suisse Managed Futures Index measures the aggregate performance of dedicated managed futures funds typically focused on investing in listed bond, equity, commodity futures and currency markets, globally.

Convertible Arb: The Credit Suisse Convertible Arbitrage Index represents managers that typically aim to profit from the purchase of convertible securities and the subsequent shorting of the corresponding stock when there is a pricing error made in the conversion factor of the security.

Hedge Fund: The Credit Suisse Hedge Fund Index is an asset-weighted hedge fund index and includes only funds, as opposed to separate accounts.

Event Driven: The Credit Suisse Event Driven Index is a measure of event driven funds that typically invest in various asset classes and seek to profit from potential mispricing of securities related to a specific corporate or market event.

Private Equity: The Morningstar Private Equity Index measure the performance of the US private equity buyout industry through a combination of liquid and publicly traded assets.

Long/Short Equity: The Morningstar Long/Short Equal Weight Index measures portfolios that hold sizeable stakes in both long and short positions in equities and related derivatives.

Market Neutral: The Credit Suisse Equity Market Neutral Index measures equity market neutral funds that typically take both long and short positions in stocks while seeking to reduce exposure to the systematic risk of the market.
